What is SD-STARS?

- South Dakota Statewide Longitudinal Data System that consolidates and links all state, district, and school wide educational data in one online warehouse

- Student
- Teacher
- Accountability
- Reporting
- System

SD-STARS Data

From where is the data obtained?

- Data is obtained from a variety of sources. Please refer to the SD-STARS Data Sources handout.
- Most data is 'universal' data collected and used by every district in SD.
- Schools using DIBELS or AIMSweb can request to have that data added to SD-STARS local assessment data section.

Do I have to input data?

- NO!
- All data is pulled, uploaded, and updated as it becomes available.
- Schools wanting DIBELS or AIMSweb data added must complete a written records release, but the data will be uploaded by the vendor and SD-STARS.

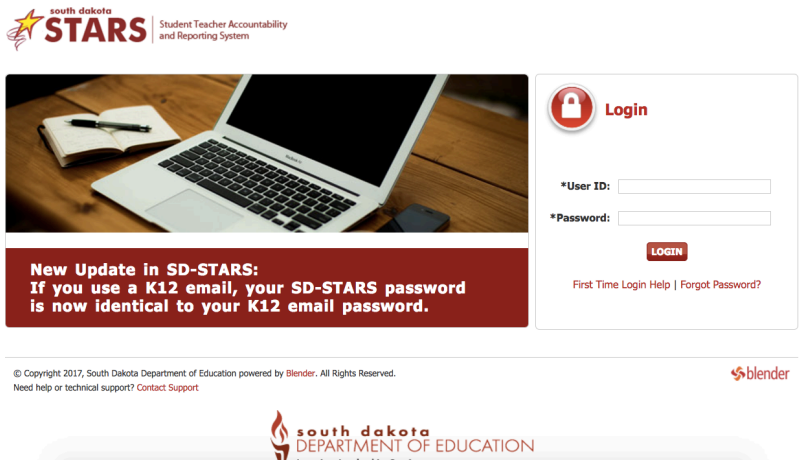
Who can access SD-STARS?

- Each district has a STARS Account Manager (SAM) who creates accounts for school personnel.
- Each SAM works with school personnel/administrators to determine who should have access and at what levels.
- Note: STARS access takes 24 hours from the time the SAM creates the account.

Why can't my colleague and I view the same reports in SD-STARS?

- What you are able to view is tied to two items:
  - your job at your school district
    - Teachers have teacher level access
    - Superintendents have superintendent level access
  - the level of access given to you by your SAM
- Teachers will only see data for their own students unless otherwise indicated by the SAM.
- FERPA laws dictate access unless otherwise indicated by the SAM.

SD-STARS Logging in https://doestars.sd.gov/login.aspx



- NOTE: After three unsuccessful login attempts, your account will be locked and your SAM will need to 'open' your account for you.

SD-STARS Home Screen

- Accountability- Data included in the district and school report cards shared with the public AND individual student data as it pertains to accountability
- Reports-All data sources compiled into various reports
- Training Center-Report DIGS and tutorials

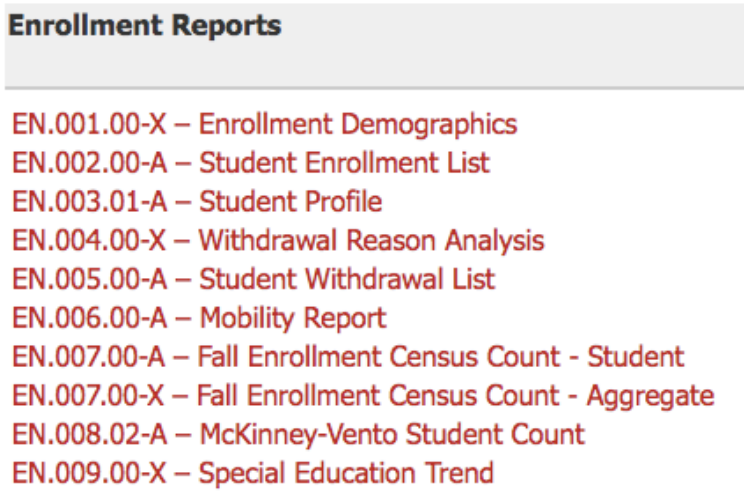
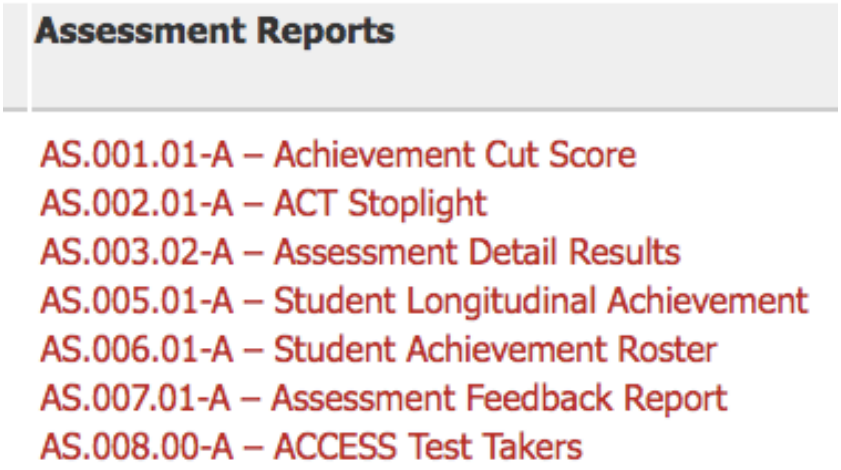
What do Enrollment Reports tell me?



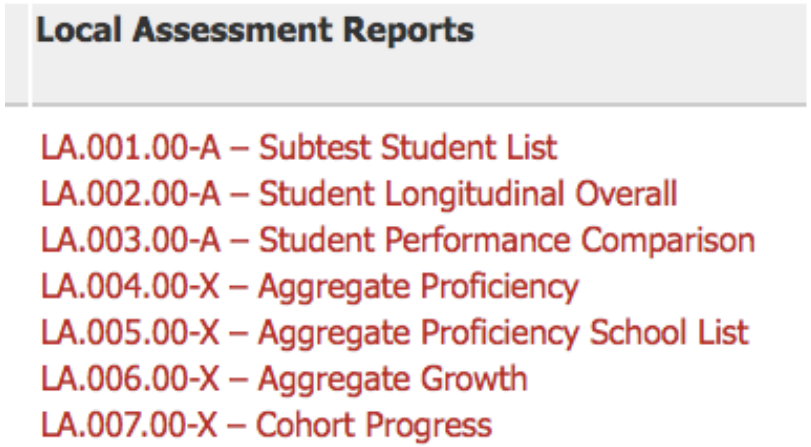
- What is our breakdown of students by ethnicity?
- Why do students leave our school?
- How many students are actually moving into and out of the school?
- How many SPED students do we have and what are their disabilities?

What do Assessment Reports tell me?



- How did our students perform on the SBAC, ACT, ACCESS, and DSTEP assessments?
- By building, by grade, by class, by student

What do Local Assessment Reports tell me?



- How do our students perform on AIMSweb or DIBELS?
- How do our students perform on those assessments compared to SBAC?
- Elementary

What do Accountability Reports tell me?

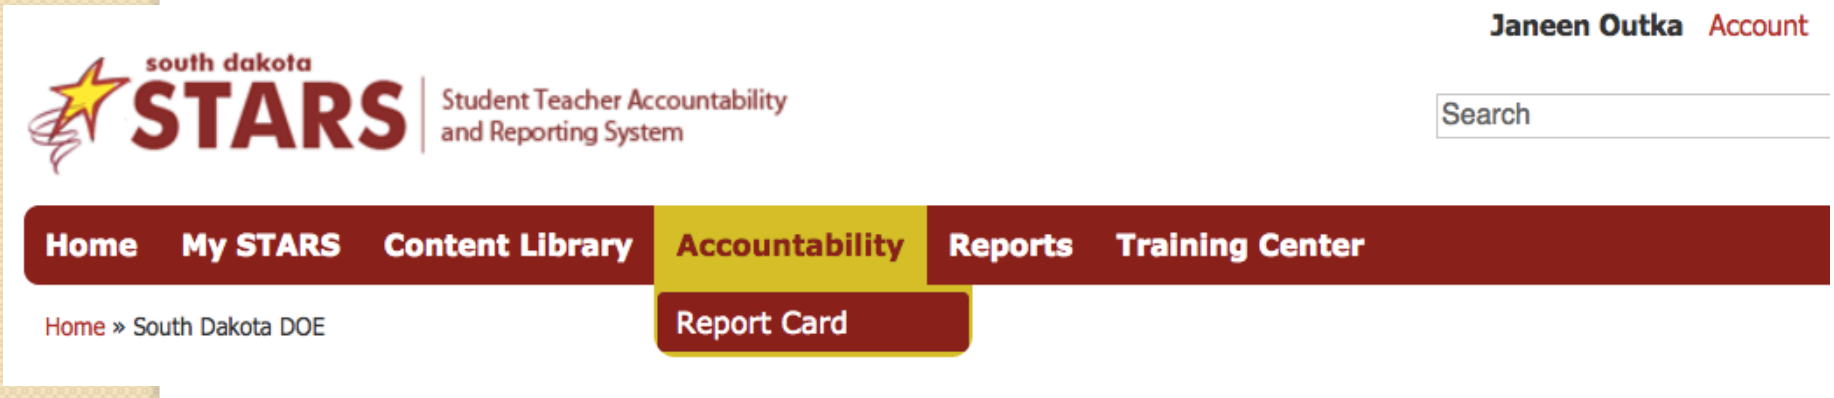
- How did our students do on the SBAC as it pertains to accountability?

Questions about Reports?

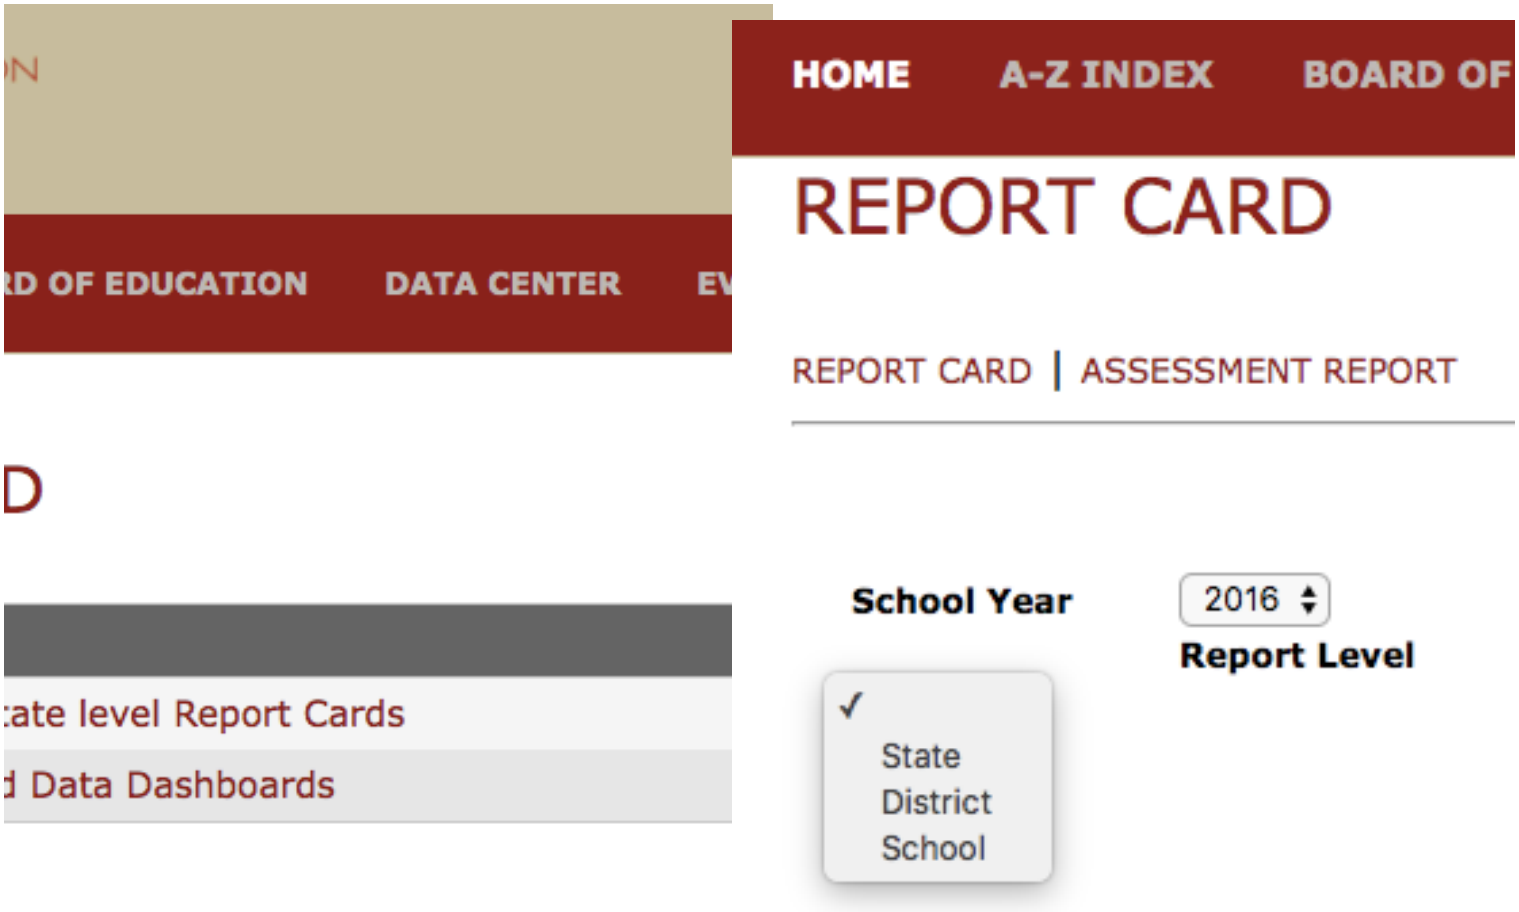
SD-STARS Accountability



What data is found in the accountability tab?

- Accountability data as it pertains to the School Performance Index (SPI)
  - Academic achievement on SBAC
  - Academic growth on SBAC
  - Attendance rates-elementary and middle
  - Graduation rates-high school
  - Career & College readiness-high school

What about the Report Card found on the DOE website?



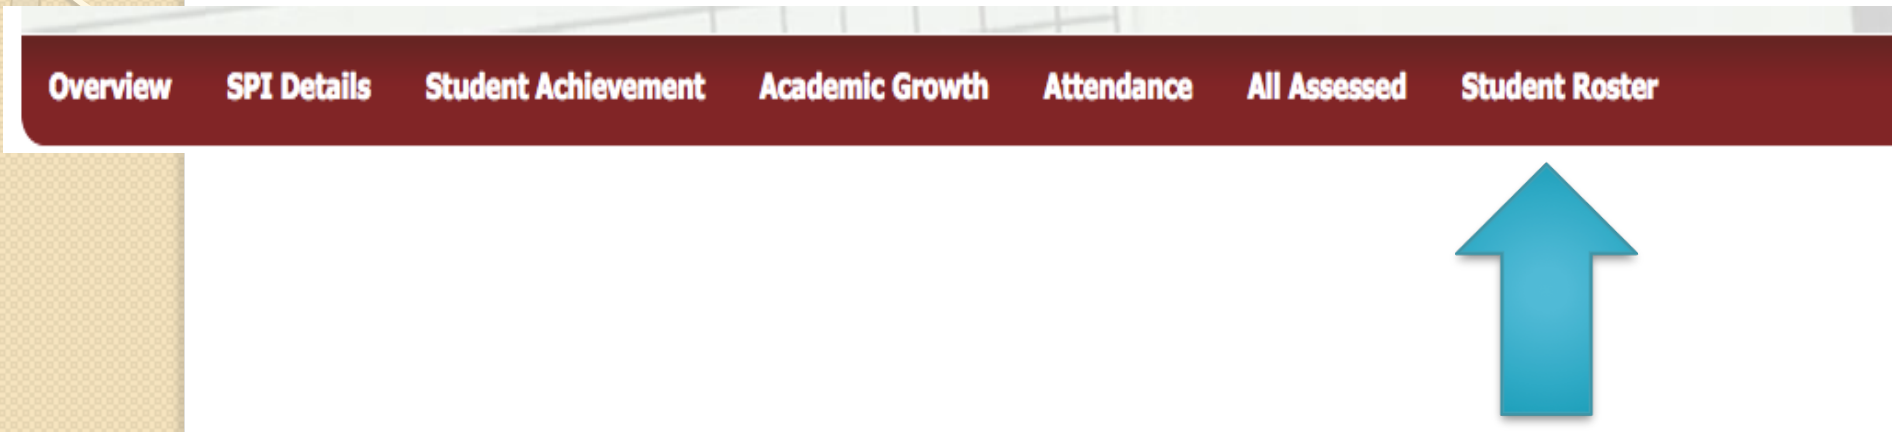
SD-STARS Accountability	SDDOE Report Card
• Includes all SPI data • Includes individual student data • Can filter data to represent desired data set	• Publicly released data • Only includes data used to calculate SPI • Data sets represents groups or buildings

Which one should I use?

SD-STARS Accountability

Once you have clicked on Report Card, you might see only YOUR school or a list of schools. Click on the school you wish to view.

SD-STARS Accountability



- Each menu selection will allow you to filter data as desired.
- ONLY Student Roster will display individual student data. All other menu selections will represent data in groups as desired.

Saving Accountability Data

- Most reports have multiple pages. Use the arrows to view subsequent pages.
- Click the arrow next to the disk icon to download reports in the desired format. You can open the downloaded reports and 'Save As' with your desired name.

- Assessment Feedback Report

SBAC Data Review Tip

Working with the data from these reports will allow you to see how every student performed on both parts of the SBAC and in exactly which sections s/he was above or below standard. Data can show strengths and weaknesses of a class, grade, or building. Combine this data with the SBAC blueprints and you can find specific focus of skills students may do well or need additional academic support.
